### Emergency Medical Services

### National Registry of Emergency Medical Technician - Basic Course

#### Introduction

The EMT renders life support to patients at the scene of their injuries or illnesses and prepares these patients for transport to the hospital. The EMT Program is delivered through a combination of classroom instruction didactic and psychomotor. Upon successful completion of the coursework, students are eligible to sit for the United State National Registry's written and practical examinations. Upon successful completions of examinations and other licensure requirements, the student will be eligible for the National Registry of Emergency Medical Technicians' (NREMT) license. All parts of NREMT practical and written exam will be taken place in Hong Kong.

Upon successful conclusion of this course, students will be proficient in the following areas and eligible for National Registry testing:

1. Airway management including oxygen administration, use of a bag-valve mask on an apneic patient, and airway adjuncts
2. Patient assessments including initial and a focused history for medical and trauma patients
3. Basic life support with use of an AED
4. Spinal immobilization of a seated or supine patient
5. Immobilization of joints and extremities as well as bleeding control and shock

#### Prerequisites

1. International High school standard or local Hong Kong old F.5 or DSE 6.
2. All students must maintain an American Heart Association Basic Life Support CPR certification through the program.
