

*Turning Sciences into Caring*

**Since 2004**

*Annual Report 14 July 2014 – 31 Dec 2015*

## **Background**

With the aging population and the ever-growing demand in the health care services in Hong Kong, there is a rising demand for the health care professionals with accredited health care training in our community. The Hong Kong Society of Professional Medical Care (HKSPMC) based on the mission of life saving, caring for the sick and community services, has designed different health training courses with the aim to generalize the health care knowledge to the public and to meet the demand of the community in Hong Kong.

## **Introduction**

Hong Kong Society of Professional Medical Care (HKSPMC) established in January 2004, is a non-government organization (NGO) and charitable institution which is exempt from tax under section 88 of Inland Revenue Ordinance. The core members are the health care professionals from Royal Army Medical Corps (RAMC). Our Principal Medical Director, Dr. David Henderson, L/RAMC, still works as a medical practitioner in Hong Kong after 1997. One of our Medical Directors, Dr. Peter Lau (Chairperson of International Trauma Life Support, Hong Kong Chapter) dedicate himself through HKSPMC to protecting human life, caring for the health of the vulnerable, turning sciences into caring by mobilizing people to serve voluntarily for sick and injury. HKSPMC Services include Health Care Services, Community Care Services, Youth and Volunteer Services, the roles are not limited to First Aid and Emergency Care training (Emergency Medical Technician, EMT), Healthcare and Medical Technology Training, Rehabilitation and Medical Escort Transportation Services.

Chief Medical Director  
Dr David Henderson  
MB BCh (Dubl), BATLS  
L/RAMC

Dr David Henderson is a graduate of Dublin University in Ireland. After graduation in medical degree with his intern year spent in England, he joined the British Army spending 25 years as a military doctor in different countries and in different medical roles, including 5 years in anaesthesia. Dr Henderson has been practicing in Hong Kong since 1995.

## **Mission**

The HKSPMC has been striving in promoting the health care knowledge in the community, improving the health care skills, training those who have the mission in caring for the vulnerable, sick and disable. HKSPMC aims at improving local health care quality through providing the diversified health care training programmes in Hong Kong. Our targets are the frontline health care professionals, those interested in taking up the health care jobs in the hospitals or old aged home, relatives or care-takers of the sick or the disabled as well as the general public.

## **Vision**

- a. In fulfilling the HKSPMC's mission in extending lifelong learning opportunities for the community, HKSPMC seeks to become a world-class centre of excellence for the provision of professional and continuing education serving Hong Kong, Mainland China and the region.
- b. To be the leading provider of vocational health care education and training in Hong Kong.
- c. To deliver effective, efficient and innovative quality assurance programmes to the public, from youth to geriatric.
- d. To provide the knowledge, skills and values to act competently and ethically in the practice of medical sciences; to deliver, efficient and innovative quality medical laboratory health check through HKSPMC Health Care Services, freely to the community.

## **Core Values**

HKSPMC strives for excellence in:

- a. Turning sciences into caring by offering free doctor consultation and laboratory services to the deprived population.
- b. Collaborating with University of worldwide and other institutions in expanding lifelong learning opportunities for career advancement, research and personal development.
- c. Delivering high-quality health care or other extended programmes to meet the needs of community.
- d. Promoting lifelong learning for the realization of a learning society and the community's pursuit of quality of life.

- e. Conducting research in adult and continuing education, as well as in medical, health care subject specialisms.
- f. Playing a leading role in Hong Kong's allied health care training and development as an education hub.

### **Milestone**

34. July 2014, HKEMSC under HKSPMC International Trauma Life Support (ITLS) Hong Kong Chapter was established.
35. 22 Sep 2014, the 6<sup>th</sup> batch intake of Diploma in Primary Health and Emergency Care (DPHEC), 2 years programme.
36. 25 Sep 2015, the 7<sup>th</sup> batch intake of Diploma in Primary Health and Emergency Care (DPHEC), 2 years programme.

## **First Aid and Health Care Training**

The Hong Kong Society of Professional Medical Care (HKSPMC) adopts the strategy of “First Aid for All” to actively popularize first aid. We provide various training courses on first aid and life-saving skills for the public to deal with the emergencies. HKSPMC promotes first aid among the public through different kinds of first aid courses and activities.

In the reporting year, we have successfully trained 22 First Aid Lecturers for the future development of first aid training.

HKSPMC has been keeping close communications with its first aid teaching volunteers and the service users to work out appropriate and diversified first aid training sessions that suits the public needs. 4200 first aiders have been trained from January 2011 to December 2015. During the years, we conducted 150 first aid training courses of 15 different kinds, totaling 5200 training hours. Out of 11000 trainees, over 97% passed and / or finished the training which also included 4095 trainees who successfully obtained the HKSAR government recognized first aid certificates with a passing rate of 98%.

## **Automated External Defibrillation Course**

With increasing availability and popularity in the use of Automated External Defibrillator, the HKSPMC launched the ‘Automated External Defibrillation (AED) Course’ July 2007 for the general public to grasp the knowledge and skills of using the machine to save lives. A total of 552 trainees graduated during the years.

## **First Aid Training for Vulnerable Groups**

The training enabled the vulnerable communities to acquire first aid knowledge, and also to build self-confidence and self-help ability.

### **First Aid Training for deprived groups**

When it comes to first aid learning, it is a totally different story between the general public and those who are ethnic minorities, people with hearing

impairment or mental retardation. Due to language or innate limitation, the latter are not able to participate in general first aid training. During the year, the HKSPMC collaborated with other organizations to tailor-make first aid training programmes to let them have equal access to the knowledge and skills that could allow them to help themselves and others in times of emergency.

In 2008, the HKSPMC has also launched the 'Domestic Helper First Aid Course' to equip domestic workers the skills to protect not just their own lives but their employers' family members.

### **First Aid Service**

First aid service is one of the core volunteer services of the HKSPMC. Our first aid volunteers provide service for the community and at public functions.

During the year, our first aiders responded to numerous requests for first aid service in events including the New Year's Day.

### **Health Training**

The HKSPMC has been offering various types of health care training courses for health care support personnel since 2004. The objective is to strengthen their professional knowledge to meet the public demands for medical, elderly and home care services.

Over the past 10 years, HKSPMC has provided first aid services and other related training to people worldwide. As a part of the emergency care training provider for public and hospitals in Hong Kong, HKSPMC is devoted to advocating 'Life Protection, Caring for the underprivileged, and Maintaining Dignity'. To protect human life and avoid accidents, HKSPMC promotes first aid knowledge and skills to the public through different first aid courses and activities. Therefore the internationally recognized first aid techniques can be practiced and promoted throughout the territory.

### **Promoting First Aid**

As we expand the scopes of our services, we have more new members and volunteers joining our team. Therefore, more tailor-made first aid training is provided for the new comers. At the same time, the organization provides high quality training for first aid lecturers, including advanced first aid knowledge, skills and teaching methodologies. Each and every of these courses is accompanied by strict assessments. Meanwhile, we have implemented a First Aid Lecturer System to unveil the potentials of our lecturers and help them

establish a network for mutual support, to involve in various first aid training courses. In this way, we hope to enhance the quality of first aid training services and strengthen the unity and the sense of belonging of our team.
